Crystal Caviar will present the best sea inspired crystal sculptures at Dubai International Boat Show 2018

The most sophisticated piece, which you can see on the show, is 70 kg marine chronometer. This clock took one year to produce and it is a must-see piece of the show.

With the exquisite selection of sea inspired crystal sculptures will Crystal Caviar once again exhibit at Dubai International Boat Show. Unique artworks you will see in Marine Art gallery. The novelty is, that this year will be the gallery officially supported by ArtSiO gallery, the partner gallery of Crystal Caviar, which represents all exhibited artists. The biggest attraction of this year's Marine art gallery will be without no doubts brand new gold marine chronometer made by Mr. Jan Frydrych and Thomas Mercer company.

Gold chronometer is third chronometer, which was made from collaboration between Mr. Jan Frydrych and Thomas Mercer company, and it is the last one from the unique series. First two chronometers were presented at Monaco Yacht Show last year. The gold chronometer is made from first class Bohemian optical glass, the time machine was supplied by Thomas Mercer. The glass body lights up the beauty and sophistication of the precision mechanism from every angle and the visual effects are constantly changing as the observer tour around the case. Except the collaboration with famous watchmaker companies Mr. Frydrych has as a collector of old watches, his own unique series of marine chronometers. The newest one – royal blue chronometer – you can also see on Dubai International Boat Show.

Except Mr. Frydrych will Crystal Caviar present another six artists. In Marine Art gallery you will see crystal sculptures from Mr. Vlastimil Beránek, his pupil Jaroslav Prošek and another international artists – yacht designer Tim Heywood and two UAE artists. We are proud to exhibit works from Dr. Najat Makki, the first Emirati woman to earn PhD. In arts, and present for the first time Mr. Mattar bin Lahej, founder of Marsam Mattar, the first art gallery in the United Arab Emirates to be managed by an artist.

„It is a great pleasure for us to cooperate with such an artists as Mr. Beránek, Mr. Frydrych or Dr. Najat Makki truly are. They are holding the tradition of Bohemian crystal sculpture still alive. Without them it will be nothing new in this field in Czech Republic. That's why is so important to present their work to the best clients on big exhibitions. And I am also glad, that we can presented also ArtSiO gallery for the first time. We founded this gallery to help artists and now I am feeling, that we actually do, if we are exhibiting at Dubai International Boat Show,“ says Marek Landa, owner of Crystal Caviar company and ArtSiO gallery.

In Česká Lípa, 13th of February 2018
